1858 Juse 1 This table discloses that notwithstanding the very late blooming last year, the crop was singular ly favored by the lateness of the fall, as frost held off natil the 20th November, which is far in excess of the ordinary average. A killing frost usually takes place between the 20th and 25th of October, so that if there be no exception to this rule next fall the growing season will not virtually be longer than was the case last year. We have no idea of broaching the topic of growth in advance of the vicinsitudes to which the plant is yet exposed, but the table above is interesting, as going to they that this has not been the earliest Beason on record, as some people smert.

CROPS DESTROY D .- The amount of sugar destroyed by the inundation in Louisians is estimated at fifty thousand hogeheads,-worth \$5,000,000. The cotion destroyed by the overflow, on the banks of the Mississippi, it is said, will be 100,000 bales, whose value would probably be \$4,000,000. In the Wabash Valley, as represented by the Evansvil e Journal, the losses, by the farmers and properly. owners will certainly be equally as heavy. That paper says:

A friend who has been voyaging over the Wabash boitoms in boats and steamers, represents the whole valley to be a lake, in width reaching ten and fifteen miles from shore to shore, and and almost requiring a compass to navigate it. He was ferried from Vincennes to Lawrenceville, in Illinois, a distance of 10 miles, over water, passing over a settled and counts in the hands of an effect, for ye for that as here were the counts in the hands of an effect, for ye for that as here were iles from shore to shore, and and almost requiring cultivated section of country, new submerged from-six to ten feet deep. These wide, rich bottoms, which yield auch stores of food, and contribute so largely to our exports, will be barren and desolate wastes this summer. Those who ordinarily supplied so many mouths by their labor, will themselves seek food this year from others. The amount of the loss is incalculable.

dulge in very courteous audidignified language towards each other, as the following, which occurred in the United States Senate recently, will show. Mr. King, of New York, commenced a reply to Mr. Toomas, of Georgia, in which he said: "I suppose I shall not be required to furnish ur

derstanding to the Seastor from Georgia, who has chosen to misunderstand the facts of this case, and of course thus to misstate them. I will read the To which Mr. Toomse replied-"I will seriainly relieve the Senator from New York from any obligation to furnish me any brains

in this case, because I have seen nothing in that Senator scourse which ind cated that he could spare This vein of wit might aprly be termed, #diamond out diamond."

Lance Bussens .- Upon the authority of the President of the American Institute, it was recently stated that the heaviest buffock butchered in this country, was the ox Washington, whose gross weight was 3,204 lbs., and weight of beef 2,174 lbs. This claim appears to be disputed, however, by some writer in the Tribune, from Pennsy vinin, one of whom claims that a bullock was buichered ne r Lancaster, on the 22nd of Fabuary last, whose live weight was 3,387, net 2,400; the other that a Berks. county or was butchered some years ago in Phila d liphis, whose live weight was 3 350, mat 2,888. A still heavier bullock is announced in the Seratoga-County Press, which says "that J. M. Coun, of Saratoga Springs, slaughtered an ox in 1847 whose

live weight was 3,620 fbs.; dressed 2,567." If this be true, Mr. Cons has probably be ten the work. THE PRESCH IN NICARAGUA - The Paris correspondent of the Lundon /imer gives a cony of the convention concluded between Costa Rica, Nicara gua, and Felix Belly, acting in behalf of Mesers.
Milland & Co., of Paris, conceding the right of an
inter-oceanic canal by way of the river San Juan

is minets nine years. is ninety nine years. The capital necessary is estimated at £13,000 000 sterling."
We have not the least doubt but that this intelli-

gence is correct. The scheme is backed by Louis Napoleon, as it has been one of his favorite projects for years. In one of his letters to Marcoleia, while a prisoner at " Ham," he asserts, that the completion of this magnificent work, is accordance with his plans, would be a "monument to his name" for all time to come - Wash.
